

To expedite your order please follow these instructions as much as you can:

Respect the minimum line thickness for positive and negative areas.

When image tracing, choose the advanced option to Ignore white.

Expand your art to convert all strokes to outlines. Overlapping objects will need to be United in the Pathfinder. If you want to hide part of an object it needs to be Merged and then all the resulting white objects deleted (select all black objects, cut them, then select all the remaining invisible white objects, delete those, and then paste the black objects).

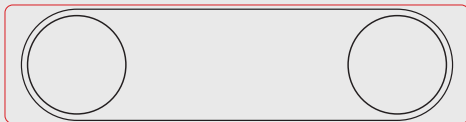

Save a copy with the template as a PDF proof.

Delete all the template EXCEPT the 110mm page frame.

Save this file as Illustrator v8 (but keep your original art as a backup).

If you can do some or all of these steps it will help us speed up our turnaround!

Standard print area is inside this rectangle  
with the rounded corners

Enable or disable the square window layer  
depending on your choice of C-0

Provided art must be black, regardless of ink colour

— Positive lines 0.1 pt minimum  
▬ Reverses should be 0.5 pt to avoid filling in.
